Forward Looking Statements

Certain statements in this report are forward looking statements. These forward looking statements can be identified by the use of forward looking terminology including the terms "believes", "expects", "estimates", "anticipates", "intends", "may", "will" or "should" or in each case, their negative, or other variations or comparable terminology. These forward looking statements reflect the Company's current expectations concerning future events. They involve various risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company, third parties or the industry to be materially different from any future results, performance or achievements expressed or implied by such forward looking statements. Such risks, uncertainties and other factors include, amongst other things, general economic and business conditions, industry trends, competition, changes in regulation, currency fluctuations, changes in business strategy or development and political and economic uncertainty. There can be no assurance that the results and events contemplated by these forward looking statements will in fact occur.

Introduction

Maiden General Försäkrings, AB. ("Maiden GF" or the "Company"), corporation number 516406-1003, is licensed to underwrite direct and indirect insurance for Class 16 – other financial loss. Maiden GF is domiciled in Sweden however coverage is provided throughout Europe under the "Provision of Freedom of Services" where passports have been granted. Maiden GF has set up a UK branch, Maiden General Försäkrings AB, UK Branch, which is in the UK's Temporary Permissions Regime and has applied for regulatory approval from the PRA and FCA in the UK.

Maiden GF is a subsidiary of Maiden Holdings, Ltd. ("Maiden" or the "Group"). Maiden is a Bermuda headquartered holding company which is traded on the NASDAQ (MHLD). Effective March 16, 2020, Maiden Reinsurance, Ltd. completed its re-domestication to the State of Vermont in the U.S. The Vermont Department of Financial Regulation is the Group supervisor.

As a result of Brexit, the Company could no longer rely on a passported permission to underwrite in the UK. From 31 December 2020, the Company was accepted into the UK's Temporary Permissions Regime ("TPR") with a deemed Part 4A permission which allows EEA firms who were formerly using a Freedom of Services (FOS) passport to operate for a limited period while they seek authorisation from the Prudential Regulatory Authority ("PRA"). The deemed Part 4A permission means that the Company continues to be an authorised person for the purpose of UK law and that the Company can continue to underwrite in the UK despite Brexit. The Company has applied for regulatory approval of its UK branch from the PRA and FCA.

This Solvency and Financial Condition Report ("SFCR") has been prepared to assist stakeholders to understand the capital position of the Company under the Solvency II framework.

The Company has ensured that it is Solvency II ("SII") compliant.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

There have been no material changes during 2021 to the reporting requirements of the Company and the Company continues to file QRTs quarterly, with an additional QRT reported annually. Within these reports the Company considers its solvency under SII standards and valuation methodologies. There is further information in the SFCR on how the valuation for solvency purposes varies from the valuation for accounting purposes. The Company continues to have adequate capital under the valuation for solvency purposes basis.

System of Governance

During 2021 there have been no material changes to the Board composition or central functions.

Risk Profile

The risks that the Company is exposed to have been identified and appropriate mitigation measures have been put in place. The risks evaluated as posing the highest threat are:

- **Data Risk:** The risk that data received from Third Party Administrators (“TPAs”) relating to policies or claims is of poor quality. Obligations for data provision are included in contracts with TPAs and data received is monitored regularly for quality and accuracy.
- **Solvency Risk:** The risk that as the business grows, the solvency margin cannot be maintained either through a lack of capital or uncontrolled growth. Capital forecasts are undertaken annually through the completion of the ORSA or when the risk profile of the Company materially changes.
- **UK Underwriting Capabilities:** Continuity of the Company to continue to service insurance policyholders in the UK if its deemed Part 4a permission allowed under the UK’s Temporary Permission Regime were to end.
- **Concentration Risk:** The risk that the Company must deliver a portfolio of new business suitably diversified by client, geography and product. The Company has a strategic goal to diversify the business and has continued to make progress on this during 2021.
- **Regulatory Risk (Compliance):** The risk that the Company fails to comply with regulation, such as Solvency II or EIOPA’s Guidelines on Outsourcing to Cloud Service Providers. The Company has a suitable governance structure in place to ensure compliance and follows regulatory developments for changes to regulation.
- **Regulatory Risk (Insurance Products):** The risk that regulatory changes in a country in which the Company operates has material implications for existing or planned products. The Company closely follows regulatory developments and assesses the potential impact on the products underwritten by the Company.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

- General Data Protection Regulation (“GDPR”) Risk: The risk that GDPR regulations are breached. GDPR requirements are monitored at a program level, are included in product launch requirements and are regularly monitored to ensure continued compliance.
- Business Development Risk: The risk that the new business that the Company underwrites does not perform as anticipated, that not enough new business is acquired or that significant existing business is cancelled. New business opportunities are being actively pursued and all new business undergoes pricing and underwriting review prior to launch, and regular monitoring of profitability once live. Business strategy is to diversify sources of income to reduce reliance on specific clients, product lines or geographies.

During 2021, there were no material changes to the risks that the Company is exposed to:

- An additional risk was added now that the Company has reinsurance in place: the failure of a reinsurer. This was considered a low risk due to the contractual structure in place, and the funds withheld mechanism.
- One risk, UK underwriting capabilities, was increased to high risk effective February 2022. This is due to the anticipated increase in the level of GWP derived in the UK.
- One high rated risk, the increased reliance on a particular outsourced provider for the provision of cloud based Software as a Service for insurance administration services, was downgraded from high to tolerable. The reduced risk is primarily due to a significant decrease in the number of insureds being administered by the provider effective February 1st, 2022.

The Company continued to monitor the impact of the coronavirus pandemic during 2021 and the resulting impact to the Company. As an underwriter of loss of income risks, there has been an increase seen in the number of claims experienced in comparison to prior years, particularly during 2020. The Company has taken action where appropriate, such as changes to customer terms and conditions and price changes. While the impact of coronavirus has now decreased, it is an evolving situation that remains an important focus of the Company.

An assessment has been undertaken as to the impact to the Company of the crisis in Ukraine. Primarily, the underwriting of the Company will not be impacted directly as the Company does not underwrite in either Ukraine or Russia, and the types of risks underwritten (loss of income due to unemployment, accident or sickness) should also not be directly impacted. The events do bring further uncertainty to the economic environment and the Company would be impacted by inflation, which is further pressurized by these events, and turbulence in the markets potentially resulting in investments being downgraded. No action has been considered

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

necessary at this point in time however it is a new and unpredictable situation and therefore the Company will continue to assess the implications as developments occur.

Capital Management

The Company monitors capital adequacy as part of its continual capital management activities and currently exceeds the Company's risk based benchmark for meeting capital adequacy. In addition, the Company has completed an Own Risk Solvency Assessment ("ORSA") which demonstrates that the Company forecasts adequate capital cover through the business plan period and has identified options to reduce risk if necessary. The greatest risk exposure is within underwriting risk. There is further information in the SFCR on how the Company manages these risks, and how the risks are mitigated against.

Effective 1 October 2021, the Company entered into a whole account Quota Share agreement with Maiden Reinsurance Ltd., a sister company domiciled in the State of Vermont, United States. The agreement, structured on the basis of a funds withheld arrangement, was effected to provide ongoing capital support to the Company as it develops its business operations.

A. Business and Performance

Note: Numbers in EUR 000s.

A.1 Business

A.1.1. Name and legal form

The Company is Maiden General Försäkrings AB, incorporated in Sweden, corporation number 516406-1003. The legal form of the Company is a Swedish aktiebolag (AB).

A.1.2. Name and contact details of the supervisory authority, and name and contact details of the group supervisor

Finansinspektionen is the supervisory authority of the Company.

Finansinspektionen
Box 7821
103 97 Stockholm

Tel: + 46 8 408 980 00
Fax: + 46 8 24 13 35

Effective March 16, 2020, the Vermont Department of Financial Regulation is the Group supervisor.

David Provost
State of Vermont - Department of Financial Regulation
89 Main Street
Montpelier
VT 05620-0501

Tel: +1- 802-828-3304

A.1.3. Name and contact details of the external auditor

Effective February 2nd, 2021, the external auditor changed to KPMG AB.

KPMG AB
Box 382
101 27 Stockholm

Tel: +46 8 723 91 00

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

A.1.4. Description of the holders of qualifying holdings

All shares issued and outstanding for the Company are owned by Maiden Holdings, Ltd., a company incorporated in Bermuda.

A.1.5. Group structure chart

The position of the Company within the Group as at 31 December 2021 is as shown in the diagram below:

Diagram 1: Company position within Group Structure

A.1.6. Material lines of business by segment and geographical region

Products to be underwritten will be payment protection insurance or stand alone income protection, in which the benefits are payable in the event of loss of income or hospitalization, and hospitalization cover. As the Company is still building its insurance portfolio, for 2021 the only products underwritten in the Company's portfolio are payment protection insurance and stand alone income protection.

During 2021 the Company underwrote business in Denmark, Finland, Germany , Ireland, Lithuania, Norway, Sweden and UK . The material geographic regions are considered to be Denmark and Sweden.

A.1.7. Significant events with a material impact

There are no significant events with a material impact to report.

A.2 Underwriting Performance

Underwriting performance, excluding operating expenses, by line of business:

€'000	Payment Protection Insurance	
	2021	2020
Gross premiums written	7,841	5,916
Net premiums written	6,338	5,916
Net premiums earned	6,341	5,920
Net commission expense	(3,874)	(3,721)
Net claims incurred	(1,119)	(1,371)
Underwriting Income	1,348	824

Underwriting performance, excluding operating expenses, by geographical area:

€'000	2021			
	Denmark	Sweden	Other	Total
Gross premiums written	2,951	3,348	1,542	7,841
Net premiums written	2,397	2,724	1,217	6,338
Net premiums earned	2,400	2,727	1,213	6,341
Net commission expense	(1,328)	(1,952)	(594)	(3,874)
Net claims incurred	(541)	(290)	(288)	(1,119)
Underwriting Income	531	485	331	1,348

€'000	2020			
	Denmark	Sweden	Other	Total
Gross premiums written	2,731	2,821	368	5,920
Net premiums written	2,731	2,821	368	5,920
Net premiums earned	2,730	2,819	367	5,916
Net commission expense	(1,516)	(2,061)	(144)	(3,721)
Net claims incurred	(875)	(282)	(214)	(1,371)
Underwriting Income	339	476	9	824

A.3 Investment Performance

A.3.1. Income and expenses arising by asset class

€'000	31/12/2021	Total Return	Total Return %
Corporate Bonds	7,340	32	0.4%
Cash	4,942	(21)	(0.5%)

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

The investment return of €32 is before investment management fees of €6.

A.3.2. Gains/losses recognized in equity

An unrealized loss on corporate bonds of €123 was booked to equity in 2021 (2020: €76 gain).

A.3.3. Information and investments in securitizations

The Company has no investments in securitizations.

A.4 Performance of other activities

Revenues are from premiums on our insurance policies, ceding commission on reinsured business and income generated from our investment portfolio.

Expenses consist largely of claims costs, commission and operating expenses.

Claim costs have three main components:

- losses paid, which are actual cash payments to insureds, net of recoverables from reinsurers;
- change in In Course of Payment reserves, which represent the best estimate of the likely settlement amount for known claims, less the portion that can be recovered from reinsurers; and
- change in Incurred But Not Reported reserves, which are reserves established for claims that have occurred but have not yet been reported to the Company. The portion recoverable from our reinsurers is deducted from the gross estimated loss.

Commissions are usually calculated as a percentage of premiums and depend on the market and line of business. Commission and other acquisition expenses are reported after: (1) deducting commissions received on ceded reinsurance; (2) deducting the part of commission and other acquisition expenses relating to unearned premiums; and (3) including the amortization of any previously deferred commission and other acquisition expenses.

Operating expenses include administration expenses, professional fees and other general operating expenses. General and administrative expenses have increased mainly due to an increase in intercompany service charges.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

Expense Type (€'000)	For the 12 Months Ended Dec 31, 2021	For the 12 Months Ended Dec 31, 2020
Net loss and loss adjustment expenses	1,119	1,371
Commission and other acquisition expenses	3,874	3,721
General and administrative expenses	2,436	837
Total Expenses	7,429	5,929

A.5 Any other information

Effective 1 October 2021, the Company entered into a whole account Quota Share agreement with Maiden Reinsurance Ltd., a sister company domiciled in the State of Vermont, United States. The agreement, structured on the basis of a funds withheld arrangement, was effected to provide ongoing capital support to the Company as it develops its business operations.

B. System of Governance

B.1 General information on the system of governance

B.1.1. Management structure: roles, responsibilities and segregation of responsibilities

The Company has established a Corporate Governance Framework which ensures that the Company’s Board of Directors (“Board”) is the focal point of the governance system and is ultimately accountable and responsible for the Company’s performance and conduct. To ensure that the Board fully discharges its responsibilities and stewardship in an acceptable fashion, the Board has established an appropriate number of functions, each with clear responsibilities and each of which reports to the Board. The system of governance has been established to ensure segregation of duties where appropriate and clear responsibilities for each function.

Diagram 2: Governance Structure

Note: Correct as of March 28th, 2022

Board of Directors

The Board is responsible for setting appropriate strategies and policies, for providing effective and prudent oversight of functions regardless of the extent to which functions are outsourced, and for monitoring the financial performance of the Company. The Board meets as warranted, but no less than three times a year. The Managing Director regularly keeps the Board of Directors apprised of significant issues and events.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

The central functions each have a nominated Board member that is responsible for overseeing that function.

Central Function	Board Oversight
Actuarial Function	Ola Hestnes
Compliance Function	Max Reid (Chairman)
Internal Audit Function	Lorna Harper
Risk Management Function	Matthias Schaefer

At most Board meetings, there is a central function and operational update, where the Board is informed on the activities within each central function area since the prior Board meeting.

Central Functions

Actuarial Function

The Actuarial Function is responsible for the development of the Technical Guidelines including Technical Calculations and implementing the methodologies agreed for calculating technical insurance reserves and technical insurance provisions on an on-going basis. In addition, the Actuarial Function assists in the preparation of the quarterly and annual assessment of capital requirements and the ORSA. This function formally provides a written report to the Board at least annually, with ad hoc updates where necessary.

Compliance Function

The Compliance Function, which is part of the “second line of defence”, promotes and monitors the integrity of the Company by advising on and complying with applicable laws, regulations and administrative provisions, particularly, in respect of the Solvency II directive, industry and professional standards and internal policies. This function formally provides a written report to the Board at least annually, with ad hoc updates where necessary.

Internal Audit

The Internal Audit Function examines and evaluates the functioning, effectiveness and efficiency of the internal control system and system of governance and makes recommendations for improvements. This function is an independent function within the Maiden group, reporting directly to the Board at least annually.

Risk Management Function

The Risk Management Function is in charge of monitoring the risk management system and the general risk profile of the Company. It provides independent oversight of the Operations’ adherence to the -Risk Management Policy. It presents to the Board detailed reporting on risk

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

exposures and advice on risk management matters. This function formally provides a written report to the Board at least annually, with ad hoc updates where necessary.

Operations

The Managing Director is responsible for the continuous management of the Company according to the guidelines and procedures approved by the Board of directors. An operational set up has been developed to allow the management of the Company to be conducted in an efficient manner, with clear responsibilities and deliverables for each functional area.

UK Branch

The UK branch of the Company has two senior managers - a Head of Branch (SMF 19) and Compliance Oversight (SMF 16) in accordance with the requirements of the UK's Senior Managers and Certificate Regime ("SM&CR") which governs how people working in financial services in the UK are regulated. The Head of Branch is responsible for management of the UK branch and provides regular updates to the Company's Board in respect of the branch.

B.1.2. [Material changes in system of governance](#)

During 2021 there have been no changes made to the composition of the Board or the Board members who have oversight of central functions. The key contact person for the service provider of the Compliance Function changed during the year and underwent a Fit and Proper assessment prior to appointment. No other changes were made to the central functions.

B.1.3. [Principles of remuneration](#)

The Remuneration Policy has been set with the aim of promoting effective risk management and preventing excessive risk taking.

Only the external Non-Executive Director (not employed within the Maiden group) is remunerated by the Company and receives a fixed salary, determined annually by the Chairman of the Company. There is no variable compensation.

Other positions within the Company considered to have a degree of influence of the Company's risk level are the Chairman and Directors. These individuals do not receive any remuneration from the Company and are remunerated by a group company.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

B.1.4. Performance criteria for entitlement to share options, shares or variable components of remuneration

No share options, shares or variable remuneration were provided by the Company during the reporting period.

B.1.5. Main characteristics of pension schemes for management and central functions

The Company does not have any pension schemes.

B.1.6. Material transactions with shareholders, persons who exercise significant control and management

During the period ended December 31, 2021, no dividends were paid from the Company to the Shareholder and there were no material transactions with persons who exercise significant control.

B.2 Fit and proper requirements

B.2.1. Description of the fit and proper requirements of management and central functions

Members of the Board of directors, persons performing central functions, the Managing Director and Head of Branch must have the skills required to manage and supervise the Company. Collectively there must be sufficient knowledge and professional experience in:

- a) Insurance, reinsurance and financial markets: The awareness and understanding of the business and economic environment in which the Company operates.
- b) Strategy and business models of the Company: A detailed understanding of the Company's business strategy and model.
- c) Governance systems: The awareness and understanding of the Company's risks and the capability of managing them and the ability to assess the effectiveness of the Company's arrangements to deliver effective governance, oversight and controls.
- d) Financial and actuarial analysis: The ability to understand and interpret the financial and actuarial information provided by other functions and take it into account in the decision-making process.
- e) Legislation and regulations applicable to the Company: The awareness and understanding of the regulatory framework in which the Company operates.

In addition, the Board, management and central functions must be honest and ethical in their personal and professional behaviour. This includes the disclosure of conflicts of interest.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

B.2.2. Description of the process for assessing the fit and proper requirements of management and central functions

Upon nomination to the Board, officer role or central function, a thorough assessment is made of their reputation, experience, and qualifications to ensure suitability for the proposed role. Potential conflicts of interest are evaluated. Once this assessment is completed, it is presented to the Board and recorded in the minutes of the Board meeting.

Annually, the skills and reputation of the Board as a whole and central functions are evaluated to ensure continued adherence to the fit and proper requirements.

In the fit and proper assessment undertaken during the reporting period by the Compliance Function, the central functions, and the Board, collectively met the required standard of maintaining a good working knowledge in each knowledge area, and individually fulfilled the proper requirements. Each assessed person completed a detailed questionnaire covering: their qualifications and memberships; relevant skills and experience; good repute and character; independence conflicts of interest and confidentiality; and employment history. All the questionnaires were then reviewed and assessed by the Compliance Function. A combined competencies assessment was undertaken and filed with Finansinspektionen during 2021.

Should a situation occur outside of the annual fit and proper assessment process that gives rise to a re-assessment of an individual or central function holder, the Board would be notified and the fitness and probity of the individual re-assessed immediately.

In addition to the above, the Board program includes an annual attestation to the Group Code of Business Conduct and an annual declaration of conflicts of interest.

B.3 Risk management system including the own risk and solvency assessment

B.3.1. Description of the risk management system

The overriding goal of the Company's risk management strategy is to control and achieve, to the greatest extent possible, a reduction in the Company's risk exposure as a means of minimising the impact of undesired and/or unexpected events. The purpose of this is to increase the likelihood of achieving the Company's strategic objectives.

The risk appetite establishes the target amount of risk that the Company is prepared to accept in order to achieve its strategic objectives. Risk appetite balances a cautious management of the operations while achieving shareholder expectations. The primary measure of the Company's aggregate risk appetite is the solvency ratio and the tolerances of this are determined by the Board. The Board also determines risk metrics and tolerances for each risk category that it is exposed to, namely underwriting and reserving risk, reinsurance risk, investment and asset liability management risk and operational risk.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

The Board has ultimate responsibility for ensuring that it manages and controls its risk satisfactorily and in order to do this, the governance framework reflects the 'three lines of defense' approach to risk management.

First Line of Defense: Operations

The Managing Director and Operations have primary accountability within the context of day-to-day operations. It ensures that operations are carried out correctly and that risk exposures are identified, evaluated, managed, controlled and reported in accordance with the risk appetite and risk policies set by the Board.

A Risk Management Committee from within the operational team will meet at least four times a year to review adherence to the Risk Management Policy across the business and document its findings. The Risk Management Committee is responsible for maintaining the Company's risk register. The risk register identifies all the risks of the business, rates their likelihood of occurrence and the severity of their impact should they occur and ensures that control mechanisms are in place to mitigate, transfer or eliminate each risk as appropriate.

Second Line of Defense: Risk Management Function

The Risk Management Function is in charge of monitoring the risk management system and the general risk profile of the Company. It provides independent oversight of the Operations' adherence to the -Risk Management Policy. It reports directly to the Board providing detailed reporting on risk exposures and advice on risk management matters.

The Risk Management Function will engage at least quarterly with Operational personnel to review risk developments, and independently review outputs, checklists and minutes from the Risk Management Committee. These reviews will be documented and presented to the Board member designated as the Responsible Person with responsibility for Risk Management.

Third Line of Defense: Internal Audit

The Internal Audit function coordinates risk-based audits to evaluate the adequacy and effectiveness of internal controls in order to challenge the design and effectiveness of the risk management system.

The Internal Audit function has full, free and unrestricted access to all areas of the Company and reports directly to the Board in order to maintain independence and objectivity.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

B.3.2. Description of how the risk management function is integrated into the company structure and decision making process

The Company has a strong risk management culture set by the Board of the Company, and this culture is disseminated through the business of the Company through the business strategy and the various processes and controls which focus on risk exposure.

As outlined above, all key persons involved in the Company assist in the identification of the risk exposures of the Company, and responsibilities are set for managing the risks to appropriate personnel across various facets of the Company. There is open communication encouraged between risk owners, the Risk Management Committee and the Risk Management Function.

Where concerns or recommendations for alternative mitigations are identified, the risk owners are informed and discussions between the Risk Management Committee or Risk Management Function and operations ensure that the issue is addressed. The Risk Management Committee or Risk Management Function will monitor progress of actions undertaken. The Risk Management Function reports to the Board at the Board meeting following each Risk Management meeting and can escalate issues to the Board outside of these meetings at any time.

All material business transactions are assessed for potential risk exposures. New business opportunities are pursued by the Company only when the risk exposures identified are perceived to be acceptable or able to be mitigated against, and considered proportionate to the size of the business opportunity.

B.3.3. Description of the ORSA process and how the ORSA is integrated into the organization structure and decision making process

The main purpose of the ORSA process is to define solvency requirements and determine the Company's risk appetite. In addition, the ORSA will identify and evaluate relevant controls and risk mitigating activities. Any potential deficit in solvency identified by the ORSA must be addressed with a specific plan and the Board should decide the actions to be taken.

The ORSA process should be undertaken annually at a minimum, but will be updated if any of the following occurs:

- The risk level exceeds the accepted risk appetite
- There are changes in the underlying assumptions for risk levels/limits
- New insurance classes are introduced or there are major extensions to existing programs
- The risk profile of the Company changes, either because of internal or external changes to the business environment
- A new business strategy is adopted.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

The process for completing the ORSA is summarized in the following five sections:

1. Identify, measure and control risks

All major risks that may threaten Company solvency are identified. The Company has developed methods for evaluating risks exposing the Company.

2. Define risk grading

Appropriate risk grading methods are maintained. The Risk Management Committee monitors and measures risk appetite and implements warning systems for when risks are changing and reaching upper limits.

3. Stress testing

Stress tests and scenario analysis are used to define future solvency requirements under certain negative and unexpected situations. Scenarios putting the Company in insolvency (reverse stress tests) may be used for determining in situations which deem the Company insolvent.

The stress tests performed in the recent ORSA were:

	Stress Test Scenario
1	Investment qualities are downgraded
2	Significant increase in the expected loss ratio
3	Whole account quota share reinsurance ends
4	Projected growth is lower

As each stress test is performed, mitigating activities are assessed that would minimize the impact to solvency.

4. Financial plan for stress test

The Solvency Capital Requirement (“SCR”) and Minimum Capital Requirement (“MCR”) and levels of solvency are calculated for each year of the business plan.

5. Potential solvency requirements

The Risk Management Function identifies potential actions for minimizing circumstances of stress tests.

The results of the ORSA provides stakeholders with crucial information to enable critical business decisions to be taken. It provides guidance for the Board of potential risk exposures, solvency requirements and capital planning. The financial projections produced are intended to

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

ensure that the Company is aware of the potential development of its risk profile and capital requirements in various scenarios. In light of this, the results of the ORSA will be used to influence, at least, product development, capital management and Company strategy and allow the Board to determine the capital requirements and set the risk appetite of the Company.

Once the process and results of the ORSA have been approved by the Board, the results and conclusions regarding the ORSA are communicated to all functions for whom the information is relevant to ensure that any necessary follow up action will be taken. Furthermore, where the ORSA has influenced the business strategy and risk appetite of the Company, central functions are informed in order to ensure that the Company operates within these objectives.

B.3.4. Review cycle of ORSA

The ORSA process is undertaken and presented to the Board for approval annually at a minimum. Prior to presenting to the Board, the ORSA will be reviewed and approved by the Managing Director. It will be updated outside this annual cycle if there are any material changes to the risk profile or strategic direction of the Company.

B.3.5. How solvency needs have been determined given the risk profile and how capital management activities and risk management systems interact

The ORSA is the Company's own perspective of the capital resources necessary to achieve business strategies and remain solvent given the Company's risk profile. The ORSA identifies and measures all material risks, includes results of stress and scenario testing on business plans and capital resources, and identifies contingent sources of capital support where necessary. There are no risk exposures identified in the risk profile of the Company that are not quantified within the ORSA calculation.

B.4 Internal control system

B.4.1. Description of the internal control system

The Board is responsible for the establishment of the internal control system under the appropriate categories: business risks and operational risks. The internal control system is designed to mitigate key risks facing the Company within these two categories.

To address business risks, the Company has created and maintains key policies and procedures surrounding risk management and its internal controls framework that identify operating and oversight responsibilities for identifying and reporting material deficiencies and fraud. The policies and procedures also identify key internal controls that establish sound accounting and financial reporting procedures. The Company has implemented internal controls to ensure that

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

its underwriting, claims processing, financial reporting and information technology systems and applications mitigate fraud, comply with regulatory requirements and meet the needs of its clients. Primary responsibility for day-to-day oversight of the internal controls framework lies with the operations team and control owners. Responsibility and accountability are promoted throughout the Company's activities by ensuring that all controls are assigned to an individual who is aware of their role.

To address operational risk, the Company has an operational risk policy included in the Risk Management Policy that seeks to address how operational risks are managed and controlled. In addition, the Company is subject to adhering to a number of policies established at a Maiden group level. Additional corporate policies that address operational risks include the Maiden Information Governance Policies, Code of Business Conduct and Ethics, Maiden Global Sanctions Program, Maiden Global Fraud Prevention and Detection Policy, Ethics Hotline, IT Policies, HR Policies, Data Protection Policy and procedures, Outsourcing Policy, and controls over financial reporting. The Board approved updates to the Company's Anti-Corruption and Anti-Bribery Policy in 2021.

It is recognised that the Company outsources its administrative and operational activities to a number of parties and the Board is required to review and assess these arrangements in accordance with the Company's Outsourcing Policy.

B.4.2. Description of the Compliance Function

The Board of the Company has the ultimate responsibility for the monitoring of compliance with laws, ordinances and internal regulations and every Board member shall be aware of and observe all external and internal regulations.

To help achieve this aim the Board has established a Compliance Function to supplement not supplant the responsibilities of the Board to ensure compliance with legislation and applicable requirements. The Compliance Function is responsible for:

- assisting the Board with ensuring ongoing compliance with legislation and applicable requirements
- enhancing the Company's awareness of compliance matters
- identifying the areas of possible non-compliance within the Company and understanding the consequences of non-compliance
- informing the Board of directors at Board meetings about such risks
- ensuring that the Board is kept informed of any amendment to the applicable regulations, legislation and guidelines or the addition of any new requirements and the potential impact on the Company

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

- providing a reasonable assessment of the effectiveness and consistency of the internal processes used to control the compliance of the Company's operations and protect its reputation through recommendations, supervision and independent controls, and
- informing the Board of directors and relevant personnel of new or changed guidelines.

The Board and the Compliance Function will agree an annual compliance plan, which will detail a monitoring program on the key internal controls to ensure that they are operating effectively and to document the tests undertaken and the results obtained.

The Compliance Function reports formally with a written report at least annually to the Board, with updates as necessary.

B.5 Internal Audit

B.5.1. Description of the Internal Audit Function

The Internal Audit Function provides an independent assessment of the adequacy of, and compliance with, the Company's established policies, procedures and risk management framework.

To achieve this, the Internal Audit Function:

- establishes, implements and maintains a three year audit plan setting out the audit work to be undertaken in the upcoming years, taking into account all activities and the complete system of governance of the Company;
- takes a risk-based approach in deciding its priorities;
- reports the audit plan to the Board;
- issues recommendations based on the audit work undertaken
- verifies compliance with the decisions taken by the Board in relation to the internal audit recommendations.

The Internal Audit Function has full, free and unrestricted access to all activities, records (in both paper and electronic format), property and personnel necessary to accomplish the stated purpose. Documents and information given to the Internal Audit Function are handled in the same prudent manner as by those employees normally accountable for them, with stringent regard for safekeeping and confidentiality.

The Internal Audit review and appraisal process does not in any way relieve other persons of the responsibilities assigned to them. Responsibility for complying with policies and procedures as well as correcting deficiencies rests with the respective employees and management.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

The Internal Audit Function presents in person a written report to the Board no less frequently than annually.

B.5.2. How the Internal Audit Function remains independent and objective

To permit the rendering of impartial and unbiased judgment essential to the proper conduct of audits, the Internal Audit Function is independent of the activities it audits. It does not have direct responsibility for, nor authority over, any of the activities reviewed and does not engage in activities which would normally be reviewed by external auditors.

The Internal Audit Function reports directly to the Board. This organizational structure is designed to allow Internal Audit to be independent of all other functions within the Company.

B.6 Actuarial Function

The Company's Actuarial Function is responsible for:

- calculating the technical provisions in conjunction with the Company
- reviewing the technical reserves and determining their sufficiency
- drawing conclusions on the appropriateness, accuracy and completeness of the data underlying the calculations
- expressing an opinion on the overall underwriting policy and on the reinsurance arrangements
- contributing to the risk management system.

The Actuarial Function reports directly to the Board and submits a written report to the Board no less frequently than annually.

B.7 Outsourcing

B.7.1. Description of the outsourcing policy and information on any critical functions that have been outsourced, including the jurisdiction in which service providers are located

The Company is obliged to establish, implement and maintain effective and transparent systems and controls appropriate to its business. The purpose of the Outsourcing Policy is to establish processes related to outsourcing arrangements and effective reporting and monitoring arrangements of outsourced activities and functions. In addition, the Outsourcing Policy exists to ensure that the Company takes into account the impact of outsourcing on its business and formally considers the additional risks associated with its outsourcing arrangements. The Outsourcing Policy enables the Company to mitigate the risk inherent with such outsourcing arrangements and control the outsourced functions.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

Additional Criteria for Outsourcing arrangements:

- that the Service Provider fulfils its obligations is in accordance with the outsourcing agreement,
- that the quality of the Company's governance system is not significantly impaired;
- that the operational risk in the Company does not increase significantly;
- that the supervisory authority's ability to exercise supervision is not impaired; and
- that the ability to provide adequate and continuous service to policyholder is maintained.

Provision for the Outsourcing agreements:

- An unambiguous description/definition of the function(s) to be outsourced and the duties of both parties.
- A notice period for the termination of the contract by the service provider which is long enough to enable the insurance company to find an alternative solution.
- That the insurance company is able to terminate the arrangement for outsourcing where necessary without detriment to the continuity and quality of its provision of services to policyholders.
- The terms and conditions, where applicable, under which the service provider may sub-outsource any of the outsourced functions and activities.
- That the service provider's duties and responsibilities deriving from its agreement with the insurance company shall remain unaffected by any sub-outsourcing.
- An agreed standard of resources and service, supported as necessary by performance measures.
- A requirement for regular detailed reporting to a specific frequency from the service provider in respect of their duties and activities.
- The service provider must have appropriate measures to protect personal data, per prevailing data protection legislation.
- The requirement to comply with all applicable laws and any other guidelines designated by the Company.
- An annual review.
- An outsourcing appendix is included within agreements with outsourced partners as standard. In summary, it requires outsourced partners to comply with applicable laws, grant audit access to the Company and its regulators and have appropriate contingency plans. The outsourcing appendix has been expanded in line with EIOPA's guidelines on outsourcing to cloud service providers.

The Company recognises that it remains fully responsible for all outsourced functions and must have procedures and the necessary expertise to monitor and control the outsourced

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

arrangements. Finansinspektionen is notified of the providers of all outsourced central and critical functions.

The Board of the Company may delegate the appointment of an outsourced partner to management but the initiation of an outsourcing arrangement must be reported to the Board.

The Company has the following outsourcing arrangements for central functions:

Function	Provider	Jurisdiction
Actuarial	Marsh AB	Sweden
Compliance	Marsh Management Services, Sweden AB	Sweden
Internal Audit	Maiden Global Servicing Company, LLC	USA
Risk Management	Maiden Global Holdings Ltd.	UK

The objective of the outsourcing policy is that all material outsourcing arrangements must allow the Company to:

- maintain understanding and control of all aspects of the outsourced function, avoiding additional undue operational risk;
- allow respective regulators to monitor the Company's compliance with jurisdictional laws and regulations;
- demonstrate the ability to measure a service provider's performance; and
- ensure that a service provider has sufficient disaster recovery functions, such that the Company's audit obligations, stability and integrity, cannot be affected by failures of the service provider.

The following is a list of criteria that must be complied with for all new outsourcing agreements and existing material outsourcing agreements:

1. The service provider has the capacity and resources to perform the outsourced functions in a reliable, correct and punctual manner;
2. No conflicts of interest exist that may affect the provision of the outsourced service. Should the service provider be a related party, a referral to the Maiden group Audit Committee is required to approve the terms;
3. The existence of a formal outsourcing agreement between the Company and the service provider, specifically covering the rights and obligations of both the Company and the service provider; and
4. Provision that local data protection law is complied with under the terms of the outsourcing agreement. Specifically, this should govern information exchange between the Company and service provider.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

In addition to standard contract provisions, the contract for outsourcing agreements should include the following:

1. A clear description of the receivables, timelines, deliverables, and legal responsibilities of the service provider under the agreement, detailing the responsibilities accepted by the service provider and those retained by the Company;
2. The requirement of the service provider to comply with all applicable laws and any other guidelines designated by the Company;
3. Provision for monitoring and oversight of the service provider so that any necessary corrective measure can be taken. This would include:
 - a. access to books, records and information relevant to the outsourced activity; and
 - b. right to conduct audits on the service provider whether by the Company's internal or external auditors, or by external specialists appointed by the Company.

The Company recognises that it remains fully responsible for all outsourced functions and must have procedures and the necessary expertise to monitor and control the outsourced arrangements.

The Board of the Company may delegate the appointment of an outsourced partner to management but the initiation of an outsourcing arrangement must be reported to the Board. Where necessary, Finansinspektionen will be notified of a change in the outsourcing provider of a central function.

B.8 Any other information

B.8.1. An assessment of the adequacy of the system of governance to the nature, scale and complexity of the risks inherent in the business

The Board considers the system of governance in place within the Company to be appropriate for the scale and complexity of the risks inherent in the Company. The system of governance is subject to regular internal review, an annual review and update of all policies and if there are changes to the underlying risk profile of the Company, the Board will consider whether changes to the system of governance are appropriate and necessary.

B.8.2. Other material information regarding the system of governance

There is no other material information regarding the Company's system of governance.

C. Risk Profile

Note: Numbers in EUR 000s.

The Company's risk management discipline focuses on both quantitative and qualitative elements as the means to achieve targeted returns through a balanced analysis and assessment of risk. The quantitative aspect of our risk management practice focuses on understanding and controlling a broad array of risk parameters in order to achieve desired returns. The qualitative aspect of our risk management practice focuses on identifying and assessing risks, and taking the necessary steps to reduce or mitigate unintended risks, or those risks that could threaten the achievement of our business objectives. The Company's risk register documents the assessment of its risk exposures.

The SCR calculated as at 31/12/2021 distributed the required capital across the risk categories as follows:

Risk Category	Proportion of Capital Required
Underwriting	68%
Market & Liquidity	20%
Credit	6%
Operational	6%

Underwriting and market risk are the greatest risks that the Company is exposed to.

C.1 Underwriting risk

While the overwhelming majority of the Company's underwriting portfolio has low volatility, material deviation of performance from expected is a key risk. Specific underwriting risks that could unfavorably affect performance and erode capital are:

Inaccurate Pricing. Underwriting performance could be affected by inaccurate pricing and underwriting of risks due to the use of erroneous or incomplete information, data misinterpretation, inaccurate assumptions, or poor or biased judgment.

Macroeconomic Factor Unanticipated, significant increase in claims frequency and/or severity, including the outbreak of a pandemic or recession.

Concentration of Risk/Lack of Diversification of Business. A significant portion of revenue derived from one source or a large presence in a certain market could present concentration risk. The loss of a relationship without replacement would meaningfully reduce its revenue and would require expenses to be spread over the remaining volume of business. With a large presence in a certain market, changes in the jurisdictional, regulatory, or economic environment could impact results.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

Reserving. The reserving process has been built to deliver the most accurate estimate possible based on the information available at the time. Reporting lags inherent in insurance claims, future trends and unanticipated events cause a range of uncertainty around where ultimate loss will land when all claims are closed and settled.

Mitigating actions in place:

Pricing Process: Where possible, the Company prices products at an individual cover level and uses a ground up approach to ensure the most appropriate assumptions for each product and cover are used.

Underwriting Performance Monitoring: Underwriting performance of products is frequently monitored and where adverse performance is experienced, action is taken either to pricing or policy wording to attempt to mitigate a continuation of the trend. Material variations in the losses incurred or claims reserved are investigated and results of this are used to improve the reserving process going forward.

Loss Reserve Adequacy: Annually the methodology used for setting loss reserves on a quarterly basis is reviewed internally and by the Actuarial Function. Part of this analysis includes an assessment on the adequacy of the reserves set and whether the corresponding methodology used was appropriate.

Reinsurance: Where appropriate, the Company considers the use of reinsurance arrangements to reduce exposure to specific lines of business.

Diversification: Strategically the Company is focusing on diversifying the product portfolio in terms of both product and source.

Company policies: The Board has approved a number of policies to assist in mitigating against underwriting risks. Specific policies that address these risks are the Technical Guidelines including Technical Calculations, Underwriting Guidelines, ORSA policy, Risk Management Policy and Business Authority Approval Process.

The Board has defined the risk tolerance for underwriting risk as follows:

Description	Metric	Limits	Tolerance per Limit
Management's right to assume risk on behalf of the Company	Maximum individual risk in relation to available capital *1	€250	Any exceptions to be decided on a case by case basis by the Board of directors

*1 The exposure per individual risk, meaning the total possible benefit payable under the insurance policy, potentially across multiple claims.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

C.2 Market Risk

The prudent person principle states the Company only assumes investment risks that it can properly identify, measure, monitor and control, taking into consideration the overall solvency needs of the Company.

The investment of funds by the Company is designed to ensure safety of principal while generating current income. Accordingly, funds are invested in liquid, investment-grade fixed income securities, for which an active market exists and values are determined by a third party. The investment policy is focused on diversification of risk and capital preservation and sets tolerances for investing in high grade marketable fixed income securities, cash and cash equivalents. In order to limit exposure to unexpected interest rate increases which would reduce the value of our fixed income securities and reduce our shareholders' equity, the Company's policy is to maintain the duration of our fixed maturity investment portfolio combined with our cash and cash equivalents within a reasonable range of the duration of our loss reserves.

The Board has established an Investment and Asset-Liability Management Policy and the Investment Committee oversees that this policy is followed. The Company's investment policy is an important component of its overall business model and is designed to preserve capital, provide significant liquidity, and produce sufficient investment income to sustain and grow net income while supporting our policyholder's needs. Specific market risks that could unfavorably affect performance and erode capital are:

Interest Rates: Investments are interest rate-sensitive and the value of the Company's portfolio may be adversely affected by increases in interest rates. Interest rates are highly sensitive to many factors, including governmental monetary policies, domestic and international economic and political conditions, and other factors beyond the Company's control.

Foreign Currency: The Company has exposure to foreign currencies both in investments and within the insurance portfolio. This presents a risk across the balance sheet.

Mitigating actions in place:

Investment Policy: The Investment Policy stipulates the investment instruments, duration, currency and credit quality that can be included within the investment portfolio. The parameters around these stipulations have been chosen to ensure that the investment portfolio correctly balances minimizing the risks outlined above while maximizing the return. Adherence to the parameters of the investment policy are monitored frequently.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

Company policies: The Board has approved a number of policies to assist in mitigating against market risks. Specific policies that address these risks are the Investment and Asset-Liability Management Policy and the Coverage of Technical Provisions policy.

The Board has defined the risk tolerance for market risk as follows:

Description	Risk Appetite	Metrics and Limits	Tolerance per Limit
Investment Risk: Market Risk	Investment Type	Cash and cash equivalents, government bonds, fixed income products, collateralized loan obligations (CLO's) or inter company loans.	Any exceptions to be decided on a case by case basis by the Board of directors.
	Credit Rating	BBB or above	Any exceptions to be decided on a case by case basis by the Board of directors.
	Concentration of credit rating	Maximum 40% of portfolio, including cash and cash equivalents, held in securities rated BBB/Baa	Any deviations to be reported to the Board of directors.
Investment Risk: Matching Risk	Covering of technical provisions	Covered by assets corresponding to at least 110% of the technical provisions.	The Board shall be notified when the Company's coverage reaches 120%.
Investment Risk: Concentration Risk	ORSA Capital	Maintain solvency capital above 150%	Tolerances per risk appetite statement

C.3 Credit risk

As a result of relationships with counterparties, the Company is exposed to credit risk through:

Investment Portfolio: The Company bears the risk of ratings downgrades of securities in its investment portfolio. Further, for any fixed income portfolio, impairment or default of individual securities is always a risk.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

Receivables: The Company bears the risk of collecting of premium payments.

Reinsurance Recoverables: Where reinsurance is entered into to mitigate against underwriting risks, such arrangements expose the Company to additional counterparty credit risk.

Financial Institutions: The Company holds the appropriate level of cash required to service forecast cashflows.

Mitigating actions in place:

Aged Debtors: The Company continually monitors and manages debtors and actively pursues overdue accounts.

Credit Risk: The majority of debtors are third party administrators (“TPA”) appointed to manage the premium collection from policyholders on behalf of the Company. Prior to appointment, all TPAs undergo a due diligence review to ensure that their financial stability is an appropriate risk for the Company to undertake as a debtor.

Reinsurance Recoverables: To counter the credit risk on the reinsurance arrangements, the Company will assess the credit rating of the reinsurance entity and require assurance of funds where necessary. A letter of credit, funds withheld or excess of loss program may be put in place for additional security.

Cashflow forecasting: Regular cash flow forecasting ensures that excessive amounts of cash are not held.

Company policies: The Board has approved a number of policies to assist in mitigating against credit risks. Specific policies that address these risks are the Investment and Asset-Liability Management policy, Underwriting Guidelines and the Outsourcing Policy.

The Board has defined the risk tolerance for reinsurance risk as follows:

Description	Metric	Limit	Tolerance per Limit
Management's right to place reinsurance on behalf of the Company	External reinsurance entity S&P rating	S&P rating AA- or above or suitable security (funds withheld or letter of credit)	Any exceptions to be decided on a case by case basis by the Board of directors
	Group company reinsurance	AM Best rating B or above	Any exceptions to be decided on a case by case basis by the Board of directors

Maiden General Försäkrings AB
 Solvency and Financial Condition Report (SFCR)
 For the twelve month period ending December 31, 2021

With effect from 1 October 2021 the Board approved the inception of an intra-company whole account Quota Share reinsurance agreement with Maiden Reinsurance Ltd., a sister company domiciled in the State of Vermont, United States as an exception to the risk tolerances.

C.4 Liquidity risk

The inherent nature of insurance claims are such that unanticipated significant claims activity under the insurance contracts, outside the Company’s historical experience, could impact liquidity at any time.

Mitigating actions in place:

Investment Criteria: A portfolio of highly liquid fixed income securities is maintained.

Financial Monitoring and Forecasting: Regular cash flow forecasting ensures that there is sufficient liquidity to meet upcoming obligations without liquidizing investments at short notice and potentially not maximizing the return on investment.

Company policies: The Board has approved a number of policies to assist in mitigating against liquidity risks. Specifically the Investment and Asset-Liability Matching policy addresses these risks.

The Board has defined the risk tolerance for liquidity risk as follows:

Description	Metrics	Limits	Tolerance per Limit
Investment Risk: Liquidity Risk	Investment Duration	Maximum ten years.	Any exceptions to be decided on a case by case basis by the Board of directors.
	Anticipated liquidity	All fixed income products shall be capable of being converted to cash within ten days.	Any exceptions to be decided on a case by case basis by the Board of directors.

C.5 Operational risk

Operational risk includes the risk of loss from inadequate or failed internal processes, people, systems and/or external events. Operational risk also includes legal risks. These types of operational failures could negatively impact the Company’s reputation with customers, clients, shareholders, and regulators.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

The Company is exposed to operational risk through:

Business Process Risks: The risk of data entry and data processing errors arising from application design misspecifications. Included in this category is the risk that models used in the business have errors embedded within, are incorrectly used, are changed without approval or become unfit for use.

Business Continuity Risks: The risks that threaten or disrupt continuous operations. This comprises business interruption that impacts the ability to access facilities or IT systems.

Compliance Risks: The risk that legal and regulatory breaches that could cause financial or reputational damage.

Cyber/Information Systems Risks: The risk of unauthorized access to systems and data, data loss, utility disruptions, software and hardware failures, and inability to access information systems.

Fraud Risks: Fraud risk includes intentional misconduct or unauthorized activities such as misappropriation of assets, information theft, forgery, and fraudulent claims.

Outsourcing Risks: This is the risk that outsourcing partners are incapable to continue to provide the necessary services.

Business Risk: This is the risk that the Company's underlying business becomes unsustainable due to a change in the regulatory environment or profitability.

Mitigating actions in place:

Company Policies and Procedures: There are a number of policies and procedures in place throughout the organization that mitigate operating risk. These include the following: Maiden Information Governance Policies, Code of Business Conduct and Ethics, Maiden Global Sanctions Program, Maiden Global Fraud Prevention and Detection Policy, Ethics Hotline, IT Policies, HR Policies, Data Protection Policy and procedures, Outsourcing Policy, and controls over financial reporting.

Compliance Global Monitoring and Reporting Program: In order to mitigate the risk of financial or reputational damage, the Compliance Function is responsible for the prevention, detection and remediation of compliance failures and risks.

The Board has defined the risk tolerance for operational risk as follows:

Description	Metrics	Metrics and Limits	Tolerance per Limit
-------------	---------	--------------------	---------------------

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

There have been no material changes to the measures used to assess risk exposures.

C.6.3. Description of the material risks and any material changes

The risks that are rated high within the Company risk register are as follows:

- **Data Risk:** The risk that data received from Third Party Administrators (“TPAs”) relating to policies or claims is of poor quality. Obligations for data provision are included in contracts with TPAs and data received is monitored regularly for quality and accuracy.
- **Solvency Risk:** The risk that as the business grows, the solvency margin cannot be maintained either through a lack of capital or uncontrolled growth. Capital forecasts are undertaken annually through the completion of the ORSA or when the risk profile of the Company materially changes.
- **UK Underwriting Capabilities:** Continuity of the Company to continue to service insurance policyholders in the UK if its deemed Part 4a permission allowed under the UK’s Temporary Permission Regime were to end.
- **Concentration Risk:** The risk that the Company must deliver a portfolio of new business suitably diversified by client, geography and product. The Company has a strategic goal to diversify the business and has continued to make progress on this during 2021.
- **Regulatory Risk (Compliance):** The risk that the Company fails to comply with regulation, such as Solvency II or EIOPA’s Guidelines on Outsourcing to Cloud Service Providers. The Company has a suitable governance structure in place to ensure compliance and follows regulatory developments for changes to regulation.
- **Regulatory Risk (Insurance Products):** The risk that regulatory changes in a country in which the Company operates has material implications for existing or planned products. The Company closely follows regulatory developments and assesses the potential impact on the products underwritten by the Company.
- **General Data Protection Regulation (“GDPR”) Risk:** The risk that GDPR regulations are breached. GDPR requirements are monitored at a program level, are included in product launch requirements and are regularly monitored to ensure continued compliance.
- **Business Development Risk:** The risk that the new business that the Company underwrites does not perform as anticipated, that not enough new business is acquired or that significant existing business is cancelled. New business opportunities are being actively pursued and all new business undergoes pricing and underwriting review prior to launch, and regular monitoring of profitability once live. Business strategy is to diversify sources of income to reduce reliance on specific clients, product lines or geographies.

During 2021, there were no material changes to the risks that the Company is exposed to:

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

- An additional risk was added now that the Company has reinsurance in place: the failure of a reinsurer. This was considered a low risk due to the contractual structure in place, and the funds withheld mechanism.
- One risk, UK underwriting capabilities, was increased to high risk effective February. 2022. This is due to the anticipated increase in the level of GWP derived in the UK.
- One high rated risk, the increased reliance on a particular outsourced provider for the provision of cloud based Software as a Service for insurance administration services, was downgraded from high to tolerable. The reduced risk is primarily due to a significant decrease in the number of insureds being administered by the provider effective February 1st, 2022.

C.6.4. Material risk concentrations

A material risk concentration refers to an exposure with the potential to produce losses large enough to threaten a company's ability to remain solvent (or maintain its core operations).

The Company manages concentration of credit risk in the investment portfolio through issuer and credit rating limitations. The Company believes it bears minimal credit risk on its cash on deposit. As a result, the Company does not consider itself to be exposed to any significant credit concentration risk on its investments.

The Company has exposure to credit risk on premiums due from third party partners. This risk is spread across a number of different third parties. Any third party who holds money on behalf of the Company is evaluated for their financial security prior to holding Company money, credit terms are strictly monitored and debts pursued where overdue. As a result, the Company does not consider itself to be exposed to any significant risk concentration on amounts owed.

The implementation of the new intra-company Quota Share reinsurance agreement presents a potential for concentration risk. The Company manages this potential risk through a funds withheld arrangement, and contractual requirements for minimum notice of cancellation periods to be observed.

C.7 Any other information

There is no other material information regarding the risk profile of the Company.

D. Valuation for Solvency Purposes

Note: Numbers in EUR 000s.

D.1 Assets

D.1.1. Separately for each material class of assets, the value of the assets, a description of the bases, methods and main assumptions used for the valuation for solvency purposes

As at 31/12/2021 the Company held the following investments:

Government & Corporate bonds	€7,340
Cash & Cash Equivalents	€4,435
Investment in participation	€ 496

All corporate bonds were rated at least BBB (S&P) and were traded on an active market. The fair value of the bonds was determined as the market price. All government bonds are of rating AA (S&P).

The Company has classified the financial investments as financial instruments according to IAS 39 (International Accounting Standards). A financial asset or financial liability should be classified as a financial instrument if it meets following conditions:

- It is acquired or incurred principally for the purpose of selling or repurchasing it in the near term
- On initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking, or
- It is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument).

D.1.2. Description of material differences, quantitative and qualitative, between the valuation bases, assumptions and methods used for the valuation for solvency purposes and those used for valuation in the financial statements

The total valuation difference between valuation bases, assumptions and methods used for the valuation for solvency purposes is displayed in section D.2 below.

D.2 Technical provisions

D.2.1. Valuation, valuation bases, assumptions and methods to derive the value of technical provisions for solvency purposes

TECHNICAL PROVISIONS

Solvency II requires Technical Provisions to be segmented by Solvency II lines of business. The Company's segmentation of lines of business is dependent on International Financial Reporting Standards ("IFRS") reserving process that groups the risks using reserving classes. Reserving classes are further split by country and then allocated by currency. The reserves cash flows are discounted by applying risk-free yield curves by currency that are provided by the European Insurance and Occupational Pensions Authority ("EIOPA") to get Technical Provisions by reserving classes. Technical Provisions by reserving classes are then mapped to the Solvency II lines of business.

VALUATION BASIS, METHODS AND MAIN ASSUMPTIONS

The technical provisions are defined as the probability-weighted average of future cash flows, discounted to take into account the time value of money considering all possible future scenarios. The cash flow projection used in the calculation of the best estimate takes account of all the cash in-flows and out-flows required to settle the insurance and reinsurance obligations over their lifetime.

Technical provisions are grouped into the following key components:

- Gross claims provisions: Best Estimate of provisions that relate to the earned exposure.
- Gross premium provisions: Best Estimate of provisions that relate to the unearned exposure i.e. driven from unearned premium and policies which are bound but not yet incepted at the valuation date.
- Risk margin: Additional provision to bring the Best Estimates to the level required to transfer the obligations to a third party undertaking.

GROSS CLAIMS PROVISIONS

The IFRS IBNR reserves are calculated at an individual program level. Typically, the calculation is a function of recently earned premium volumes, expected lags in claims reporting, expected loss ratios and average claim payments. The calculation is specific to the individual program and is tailored to account for the specific characteristics of that program. IFRS best estimate of IBNR and case reserves are used as the starting point to estimate the gross claims provisions before the following adjustments are applied:

- Expenses

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

- Discounting
- Reinsurance recoveries (where necessary)

GROSS PREMIUM PROVISIONS

The Unearned Premium Reserve includes the unearned premium balance as at the valuation date and is used as the starting point to estimate gross best estimate premium provisions before the following adjustments are applied:

- Application of budget loss ratios to reduce the unearned premium reserve for claims liability
- Policies which are bound but not yet incepted at the valuation date
- Expenses
- Discounting
- Future premium (payables and receivables)
- Reinsurance recoveries

The Company has €36 Unearned Premium Reserve as at 31/12/2021.

The calculation of the expected profit included in future premiums has been carried out separately for the homogeneous risk groups used in the calculation of the technical provisions.

The expected profit included in the unearned premiums, net of reinsurance, as calculated for 2020 is EUR 3.

REINSURANCE RECOVERIES

The reinsurance recoveries are calculated separately for the claims provision and the premiums provision, with the ceded IFRS reserves and ceded unearned premium reserve respectively used as the starting point in the calculation.

For materiality reasons, the reinsurance payables are adjusted by the undiscounted value associated with the losses. This will be revisited annually.

RISK MARGIN

The simplified method (simplifications method 1) described in the document “Guidelines on the valuation of technical provisions”, EIOPA-BoS-14/166, guideline 62) approximates the individual risks or sub-risks within some or all modules and sub-modules to be used for the calculation of future Solvency Capital Requirements.

VALUE OF TECHNICAL PROVISIONS FOR EACH LINE OF BUSINESS (EUR 000)

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

Line of Business	Gross Best Estimate	Risk Margin	Total Gross Technical Provisions	Reinsurance Best Estimate
Miscellaneous Financial Loss	2,384	247	2,632	(2)

D.2.2. The level of uncertainty associated with the value of technical provisions

The main contributors for uncertainty are:

- Uncertainty in cash flows. The payment of current and future claims is dependent on the cash flows projected by the Company
- Uncertainty in expenses. Actual expense may differ from the expected expense used in the calculations
- Uncertainty in assessing future claim amounts. Plan loss ratios are used to calculate the expected losses from unearned business in the premium provisions
- Uncertainty from model error. Model error occurs when the methodology used does not accurately reflect the development process for the line of business (i.e. misspecification of the model).

The level of uncertainty is mitigated against through the various risk management procedures in place. In particular, pricing and financial forecasting is stress tested to establish the level of variance that the Company can withstand. The level of uncertainty associated with the value of the technical provisions is within the risk appetite of the Company.

D.2.3. Separately for each material line of business, a qualitative and quantitative explanation of any material differences between the bases, methods and main assumptions used for the valuation for solvency purposes and those used for valuation in its financial statements

Below are the material differences between the Solvency II balance sheet and the statutory balance sheet.

Technical provisions (amounts in EUR 000)

Items	Statutory	Solvency II	Difference
Technical provision/ Best estimates	- 2,029	- 2,384	- 355
Risk Margin	0	- 247	- 247
Total	- 2,029	- 2,632	- 603

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

Reinsurance share of technical provisions (amounts in EUR 000)

Items	Statutory	Solvency II	Difference
Technical provision/ Best estimates	438	- 2	- 440

The total difference between the valuation of the above assets and liabilities is -1,043 EUR.

Best estimate

The technical provisions are to be valued at the current amount that the Company would have to pay if they were to transfer their insurance obligations immediately to another insurance company. The best estimate shall correspond to the probability-weighted average of future cash-flows, taking account of the time value of money (expected present value of future cash-flows), using the relevant risk-free interest rate term structure. The best estimate shall be calculated separately for the premium provision and for the provisions for claims outstanding for insurance obligations.

Risk margin

The risk margin is related to the amount that insurance and reinsurance undertakings would be expected to require in order to take over and meet the insurance obligations of the Company. The risk margin has been calculated by using one of the simplification methods described in the Technical Specifications. The simplified method (simplifications method 1) described in the document "Guidelines on the valuation of technical provisions", EIOPA-BoS-14/166, guideline 62) approximates the individual risks or sub-risks within some or all modules and sub-modules to be used for the calculation of future Solvency Capital Requirements.

The largest differences are found in the Best Estimate of technical provisions and the Risk margin. In addition, the revaluation of these creates deferred tax asset on the Company balance sheet.

D.2.4. Matching adjustment

The matching adjustment is not applicable for the Company.

D.2.5. Volatility adjustment

The volatility adjustment is not applicable for the Company.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

D.2.6. Transitional risk-free interest rate-term structure

The transitional risk-free interest rate-term structure is not applicable for the Company.

D.2.7. Transitional Deduction

The transitional deduction is not applicable for the Company.

D.2.8. Recoverables from reinsurance contracts and special purpose vehicles

Reinsurance recoverables are expected to be valued on a basis consistent with the insurance obligations. Allowance shall be made for any reinstatement premiums that may be payable to reinsurers. Allowance shall be made for expected uncollectable amounts.

Statutory reinsurance recoverables as of December 31, 2021 were €438.

D.2.9. Material changes in the relevant assumptions made in the calculations of technical provisions compared to the prior period

There are no material changes in the assumptions made in the calculations of technical provisions compared to the prior period.

D.3 Other liabilities

D.3.1. Valuation, valuation bases, assumptions and methods to derive the value of other liabilities for solvency purposes

The Company has evaluated that all other assets and liabilities on the Company's balance sheet are in compliance with the valuation principles stated in the Solvency II legislation.

D.4 Alternative methods for valuation

Alternative methods of valuation are not applicable for the Company.

D.5 Any other information

There is no other material information regarding the valuation of assets and liabilities for solvency purposes.

E. Capital Management

Note: Numbers in EUR 000s.

E.1 Own Funds

E.1.1. Overview

The Company's primary capital management objectives are to maintain a strong capital base to support the development of the business and to meet regulatory requirements at all time. The Company aims to continue to grow capital through profitable underwriting and operating results.

The Board sets a solvency capital target annually in line with the Company's risk appetite and seeks to maintain at least this level of solvency at all times. Capital adequacy is included within every financial report, which is presented to the Board at each Board meeting, and solvency margins are reported more frequently to the Board when required.

Annually the Company undertakes the completion of the ORSA to determine projected capital requirements including scenario testing, over a three year time horizon; more frequent reviews would be conducted if there are major changes contemplated in any capital driver.

There have been no material changes in the capital management policy.

E.1.2. Amount and quality of own funds categorized for each tier

EUR 000s	Total Own Funds	Tier 1 (Reconciliation Reserve)	Tier 3 (Deferred Tax Asset)
31 st December 2021	8,249	7,898	352
31 st December 2020	8,625	8,597	28

E.1.3. Eligible own funds categorized by tiers to cover SCR

All own funds are tier 1 and tier 3 assets and are eligible to cover the SCR.

E.1.4. Eligible own funds categorized by tiers to cover MCR

All own funds that are tier 1 assets are eligible to cover the MCR.

The largest differences are found in the Best Estimate of technical provisions and the Risk margin. In addition, the revaluation of these creates deferred tax asset on the Company balance sheet.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

E.1.5. Transitional arrangements

There are no transitional arrangements.

E.1.6. Ancillary own funds

There are no ancillary own funds.

E.1.7. Description of any item deducted from own funds and a brief description of any significant restriction affecting the availability and transferability of own funds

There are no items deducted from own funds and no significant restrictions affecting the availability and transferability of own funds.

E.2 Solvency Capital Requirement and Minimum Capital Requirement

E.2.1. SCR and MCR requirements at the end of the reporting period

Amount of the SCR and MCR at the end of the reporting period:

SCR	€ 4,438
MCR	€ 3,700

E.2.2. The amounts of the SCR split by risk modules

The SCR tree below presents the Company's SCR and MCR, separated by risk category, as at December 31st, 2021.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

E.2.3. Information on whether simplified calculations are used and for which risk modules and sub modules of the standard formula

The risk margin has been calculated by using one of the simplification methods described in the Technical Specifications. Simplification Method 1, prescribed by EIOPA-BoS-14/166, guideline 62 is used.

E.2.4. Information on whether and for which parameters of the standard formula the undertaking is using undertaking specific parameters pursuant to Article 107(7)

The Company is not using any specific parameters pursuant to article 107(7).

E.2.5. Information on the inputs used to calculate the MCR

The information that has been used for the MCR and SCR calculations is approved by the Board of the Company and the Actuarial Function.

Maiden General Försäkrings AB
Solvency and Financial Condition Report (SFCR)
For the twelve month period ending December 31, 2021

E.2.6. Any material changes to the SCR and MCR over the reporting period and the reasons for such changes

The SCR and MCR have fluctuated over the period as a result of changes to the underlying risk, new business commencing, additional capital provided and the execution of the whole account quota share agreement.

E.3 Use of the duration-based equity risk sub-module in the calculation of the Solvency Capital Requirement

The Company is not utilizing the equity based sub-module.

E.4 Differences between the standard formula and any internal model used

The Company is not using an approved internal capital model.

E.5 Non-compliance with the Minimum Capital Requirement and non-compliance with the Solvency Capital Requirement

There have been no periods of non-compliance with the MCR or SCR.

E.6 Any other information

There is no other material information regarding the capital management of the Company.
